FLAG VOICE

Coast Guard Nationwide Housing Satisfaction Survey

August 25 2026

Colleagues,

On October 1, 2026, we will launch our second annual Nationwide Housing Satisfaction Survey (NHSS)- a cornerstone of our commitment to improving the quality of life for every member of the Coast Guard. This is more than a survey; it is a critical leadership tool that provides an unvarnished, enterprise-wide view of our housing landscape, from government quarters to private-sector accommodations. The NHSS is a confidential and voluntary 10-minute survey administered directly to all active-duty members.

The data we gather is a catalyst for immediate and strategic action. I am asking for your direct leadership to champion this effort and ensure the voices of your members are at the forefront of this crucial initiative.

Last year, our members delivered an exceptional 44.4% response rate, providing statistically robust insights that are already fueling significant readiness and support actions. Building on this success, we also launched the permanent Coast Guard Housing Feedback Form to establish a continuous, real-time channel for member input.

Our goal is clear: to provide safe, modern, and reliable housing for every single member. To achieve this, your leadership is paramount. Please amplify this message through your commands and encourage your people to take these ten minutes to help shape our housing enterprise for years to come.

For additional resources, please direct your teams to the Office of Housing Management (CG-WMM-3) SharePoint site.

Thank you for your advocacy and for driving this critical workforce priority.

Semper Paratus,
